### Explanation of the above Table.

In the table above it is to be understood that the word "*near*" and the character ☌ (conjunction) are synonymous, and mean that the two bodies are *nearest* each other at the time expressed, and that they are then on a line running from the North Pole through both bodies, and have the same *right ascension*. GR. ELON. means greatest elongation, or greatest apparent angular distance from the SUN. STATIONARY means that the planet is then without apparent motion east or west with respect to the Stars, and is about to move in a direction contrary to that it last had. The character ☍ indicates that the planet is opposite the Sun, or 180 deg., or a half circle, east of it, and rises when the Sun sets, and sets when he rises. When a planet is a quarter of a circle, or 90 deg. from the Sun, east or west, it is known by □.

PLANETARY CHARACTERS. — ☿ Mercury, ♀ Venus, ♂ Mars, ♃ Jupiter, ♄ Saturn, ♅ Uranus, ♆ Neptune, ☾ Moon.

The above table enables us to find the planets throughout the year.

# TRADE AND COMMERCE.

NOTE.—*In the following tables it will be understood that the fiscal year of the United States and that of the Dominion of Canada, end with the 30th of June. That of Great Britain ends with the 31st of December. The imports of the United States are rated at their coin value in the ports from which they are shipped. The imports of Great Britain are rated at their value, exclusive of duty, in the British ports where they are entered, including freights and profits of the importer. The values of the foreign trade of Great Britain are uniformly given in pounds sterling, the value of which is $4 86 and 65-100ths cents in our gold coin.*

The crisis of 1873 has been followed by similar effects, and so was the panic of 1866, the consequences of which were mainly confined to Great Britain. At the present time (November, 1875) the appearances are that the effects of the panic and the general commercial depression will continue to the end of the current fiscal year.

By comparing the five years with each other, it will be found that the imports and consumption of tea, coffee, sugar and molasses are main-

tained with great steadiness, both in the United States and Great Britain. The greatest falling off in the imports of the United States and the exports of Great Britain, is shown in iron and steel and the manufactures of these articles. The quantities of the various manufactures of iron imported into the United States in 1874–5 are not one-fifth those imported in 1871–2. Next come the manufactures of cotton, woolen, silk and linen. The British exports of cotton manufactures, however, though greatly diminished in value, still show an increase in quantity. As might be inferred from the state of trade, the falling off in values of articles which show a decline is usually greater than the decline in quantities. In 1875, as compared with 1874, the exports of the United States show a serious decrease in cottou, wlicat and wheat flour, petroleum, bacon and hams, tallow and leaf tobacco, the decrease in these important articles showing itself in quantities as well as values.

In THE TRIBUNE ALMANAC of last year, we made the following observations in regard to the export trade of the United States, the truth of

which is confirmed by the events of the twelve months which have passed since the tables for last year were compiled: "In examining the exports of the United States, the great fall in the value per cwt. of cotton and provisions, comparing 1869–70 with 1873–4, is to be noticed. Other striking features are the enormous quantities of breadstuffs and provisions exported in the last three years, the increase ranging from two to fivefold in four years. In the case of some of these articles, the capacity of the foreign markets to absorb our productions appears to have been reached, and no further increase is to be expected, at least until trade in Great Britain becomes more active. Bacon, hams, beef and lard are examples of the products to which we refer. On the other hand, there is reason to expect an increase in the exports of coal, leather, manufactures of iron and steel and cotton goods. The nation is under a necessity to export, both in payment for its imports and for the settlement of its large debts to foreigners. If cotton, breadstuffs, provisions, petroleum, tobacco and the available coin and bullion prove inadequate for such payments, other articles will be taken—namely, manufactures."

It appears, from the foregoing statement, that nearly 50 per cent. of the aggregate importations into the Dominion during the last fiscal year, were from Great Britain, and 43 per cent. from the United States; the import trade with both these countries amounting together to nearly 93 per cent. of the whole importations.

# STATISTICS of the IRON MANUFACTURES of the UNITED STATES.

COMPILED FROM THE REPORT OF JAMES M. SWANK, SECRETARY OF THE AMERICAN IRON AND STEEL ASSOCIATION.

Presented to the members, October 1, 1875.

## PRODUCTION OF PIG IRON IN THE UNITED STATES IN 1874.

The American Iron and Steel Association has received from the producers and from its correspondents full statistics of the production of pig iron in the United States in 1874. The total production was 2,689,413 net tons, against 2,863,278 net tons in 1873, and 2,854,558 net tons in 1872, showing a decrease of 178,865 tons as compared with 1873, and 165,145 tons as compared with 1872. Notwithstanding this decrease, the production in 1874 was much larger than has been generally estimated—much larger even than partial returns made to the Association at the close of 1874 indicated.

In 1872 there was every inducement for furnace-owners to make all the iron that was possible, for prices were high and the demand was constant; hence the hitherto unexampled yield of that year, 2,854,558 tons. In 1873 a number of large new furnaces, built in that year and in 1872, were put in blast, and during the first half of the year greatly augmented the production of iron over that of the corresponding period of 1872. Had the prices of 1872 been maintained during 1873, and the demand for iron experienced no abatement, there can be no doubt that the production of 1873 would have reached 3,500,000 tons. But at the beginning of summer it became evident that production was outrunning consumption, and it will be remembered that on the 19th of June a convention of pig iron makers assembled at Cleveland, and adopted a resolution recommending a restriction of production. This recommendation was so far followed or anticipated as to cause the blowing out during the summer of a number of furnaces, Others were blown out for repairs, at various periods during the year, and were not again put in blast. In September the panic came, and it was at once made evident, by the resultant shrinkage in prices and decrease in consumption, that production would have to be still further reduced, and accordingly a number of additional furnaces were blown out, so that, by the close of the year, of 665 furnaces then completed, 252 were out of blast and 413 were in blast. The production of the year was 2,868,278 tons, or 13,720 tons in excess of that of 1872. The year 1874 opened with 413 furnaces in blast, in which nearly every one of the large new and improved furnaces built in 1872 and 1873 was included. The hopes of a revival of business that were entertained at the beginning of the year were soon found to be delusive, and then began the agitation of the policy of still further restricting production by means of a definite system which should aim at an equitable division of the trade. This agitation proved fruitless, but while it was pending very few furnaces were blown out, while fully as many others, some of which were new, were blown in. It was not until near the close of the year that a general determination to blow out furnaces was reached, and when the year closed, of 701 furnaces then completed, 336 were out of blast and 365 were in blast. The production of the year was 2,689,413 tons, or 178,865 tons less than the product of 1873.

When we consider that the furnaces which made 2,854,558 tons of iron in 1872 were mostly small; that the lessened number of furnaces which made 2,868,278 tons in 1873 included all the large and improved new furnaces; and that there were almost as many furnaces in blast in 1874 as in 1873, the best furnaces running, while the poorest stood idle, we need no longer wonder that the production of 1874 was 2,689,413 tons, or only 178,865 tons less than the product of 1873.

The quantity of pig iron of all kinds which was on hand and unsold at the close of 1874 in the hands of makers or their agents was 795,784 net tons. The quantity which was held by speculative parties, or was in the hands of creditors, or in the hands of consumers, was undoubtedly large; so that, at the close of 1874, the total quantity of pig iron in the country, exclusive of the small stocks of foreign iron, may be safely estimated at 1,000,000 tons. Prices could not be expected to improve under such circumstances, and, although more furnaces have blown out since the 1st of January than have been blown in, the quantity of iron that has been made since then, joined to the 1,000,000 tons then on hand, has been entirely too large to exercise any other than a depressing effect on the market. On the 1st of February, 1875, of 701 completed furnace stacks in the country, there were in blast 303 stacks, and out of blast 398 stacks. Sixty-two furnaces had been blown out in January. Since February 1st the number of furnaces out of blast has been slightly increased. The number of new furnaces completed in 1874 was 38, against 50 in 1873 and 41 in 1872. The astonishing number of 46 stacks is reported as being in course of erection in 1875, while others are projected.

Below we present a table showing the growth of the pig iron branch of the iron trade of the United States from 1854 to 1874, compiled from statistics procured by this Association.

### PRODUCTION OF ROLLED IRON IN THE UNITED STATES IN 1874.

Below will be found a table showing the production in net tons by States of all forms of rolled iron produced in the United States in 1874, including all kinds of rails, and nails and spikes. As heretofore explained, our statistics of rolled iron embrace bar, band, hoop, plate, sheet, angle, girder, beam, boat, guide, rod, and bridge iron, and rolled axles. All forged iron, such as anchors, anvils, hammered axles, cranks, ships' knees, etc., is carefully excluded, because it is impossible to learn the whole amount of iron hammered or forged in the vast number of machine-shops, locomotive works, marine engine works, anchor works, and similar establishments of the country.

The total production of all rolled iron in 1874, Bessemer steel rails included, was 1,839,560 net tons, against 1,966,445 tons in 1873, a decrease of only 126,885 tons. This decrease was all in rails. Of the total p oduct of the rolling mills in 1874, 1,110,147 tons were rolled iron other than rails, against 1,076,368 tons in 1873, an increase of 33,779 tons. The number of tons of nail plate consumed in 1874 was 245,609 net tons, against 201,235 tons in 1873, an increase of 44,374 tons. The increase of 33,779 tons in the aggregate production of rolled iron other than rails in 1874 was therefore wholly in the department of cut nails and spikes. The total number of kegs of cut nails and spikes produced in 1874 was 4,912,180, against 4,024,704 kegs in 1873.

The following table will show the comparative production of rolled iron, excluding rails, and of cut nails and spikes, in all the States in 1873 and 1874.

### PRODUCTION OF RAILS IN THE UNITED STATES IN 1874.

The total production of rails of all kinds in the United States in 1874, was 729,413 net tons, against 800,077 tons in 1873, 1,000,000 tons in 1872, and 775,733 tons in 1871. The following table will show the States which produced rails in 1874, and the character of the product, in net tons.

The whole number of rail rolling mills in the country in 1874 was 91, of which 51 make heavy rails mainly, and 84 make only light or street rails. Of the whole 91 mills, 22 made no rails in 1874. The product of the year was therefore rolled by 69 mills, and many of these ran only a part of the time. The capacity of all the rail rolling mills of the country is at least double the product of 1874, which was 729,413 net tons. Of the 67 mills which made rails in 1874, 7 made both iron and Bessemer steel rails, 1 made Bessemer steel rails exclusively, 2 made steel-headed

rails exclusively, 2 made steel-headed rails and iron rails, and one made solid cast steel rails and iron rails.

The following summary will show the sources of rail supply during these three years, in net tons:

| Consumption | 1,530,850 | 1,148,850 | 837,695 |

Our exports of rails during the past four years have not been sufficiently large to affect appreciably the above figures of home consumption. They were as follows in net tons: 1871, 333; 1872, 1,212; 1873, 375; 1874, 1,257.

Below is a table which shows the production of each of the rail-making States during the past four years. The production of street, mine, and light rails in 1872 is given in the aggregate, but in the other years it is incorporated with the general rail product of the several States:

## PRODUCTION OF BESSEMER STEEL IN THE UNITED STATES IN 1874.

The eight completed Bessemer steel establishments in this country were not fully occupied in filling orders during 1874. Nevertheless, the product of the year was greater than that of 1873. The production of Bessemer steel rails in 1874 was 144,944 net tons, against 129,015 net tons in 1873—a gain of 15,929 tons. The production of Bessemer steel rails in this country, since 1867, when they were first made upon orders, has been as follows in net tons:

| | | | |
|---|---|---|---|
| 1867 | 2,550 | 1871 | 38,250 |
| 1868 | 7,225 | 1872 | 94,070 |
| 1869 | 9,650 | 1873 | 129,015 |
| 1870 | 34,000 | 1874 | 144,944 |

Below is a table of the annual production in this country of merchantable Bessemer steel for *all* purposes, from 1867 to 1874, in net tons:

| | | | |
|---|---|---|---|
| 1867 | 3,000 | 1871 | 45,000 |
| 1868 | 8,500 | 1872 | 110,500 |
| 1869 | 12,000 | 1873 | 157,000 |
| 1870 | 40,000 | 1874 | 176,579 |

The total quantity of pig iron converted by the Bessemer or Pneumatic process was 140,404 net tons in 1872, 183,534 tons in 1873, and 204,852 tons in 1874.

The Edgar Thomson Steel Company Limited made their first blow on Thursday, August 26th last, started their blooming mill on Friday, Aug. 27th, and rolled their first rail on Wednesday, Sept. 1st. The works at once went into full operation. This company makes the ninth that is now eugaged in making Bessemer steel rails in this country. The Lackawanna Iron and Coal Company will follow before the close of this year. The foundations of the Bessemer plant of the Vulcan Iron Works at St. Louis have just been laid.

The quantity of Bessemer ingots made in the United Kingdom during the last five years is stated as follows, by competent authority, in gross tons: In 1870, 215,000 tons; 1871, 329,000; 1872, 410,000; 1873, 496,000; 1874, 540,000.

The imports of steel rails from all countries into the United States in the calendar year 1874 were 100,486 net tons, against 159,571 tons in 1873, and 149,786 tons in 1872. Prior to 1872 the imports of steel rails were not separately classified, and there is consequently no record of the quantity imported. In the following table we give in net tons the production and importation of steel rails during the past three years, the combined figures indicating the consumption in those years:

| STEEL RAILS. | 1872. | 1873. | 1874. |
|---|---|---|---|
| Production of Bessemer steel rails | 94,070 | 129,015 | 144,944 |
| Importation, ditto | 149,786 | 159,571 | 100,486 |
| Consumption, ditto | 243,856 | 288,586 | 245,430 |

The average price in currency at which American steel rails have been sold at the works since the establishment of the industry, is shown in the following summary:

| | | | | | | |
|---|---|---|---|---|---|---|
| 1867 | $160 | 1869 | $132½ | 1871 | $102½ | 1873 | $120½ |
| 1868 | 158½ | 1870 | 106¾ | 1872 | 112 | 1874 | 94¼ |

The prices obtained at the works thus far during 1875, have averaged about $75.

Below is a table showing, in net tons, the total production of steel other than Bessemer in this country during the past ten years:

| | | | |
|---|---|---|---|
| 1865 | 15,262 | 1870 | 35,000 |
| 1866 | 18,973 | 1871 | 37,000 |
| 1867 | 19,000 | 1872 | 38,000 |
| 1868 | 21,500 | 1873 | 50,000 |
| 1869 | 23,000 | 1874 | 47,481 |

During the calendar year 1874 our imports of steel ingots, bars, sheets and wire amounted to $2,678,611, against $3,865,316 in 1873, $4,106,087 in 1872, and $3,460,735 in 1871. Our exports of these articles in 1874 amounted to 343 net tons of the value of $29,557, against 26 tons in 1873 of the value of $5,481, 9 tons in 1872 of the value of $3,624, and 30 tons in 1871 of the value of $7,364. The increase in our exports and the decrease in our imports of these commodities in 1874 are very marked, and the statistics for 1874 are equally encouraging to the home manufacturer.

SUMMARY OF IRON AND STEEL PRODUCTION IN 1874.

From the foregoing statistics of the production of pig iron, rails, bar iron, steel, etc., in the United States in 1872, 1873 and 1874, the following table of the aggregate production of iron and steel is compiled, embracing the different branches of the iron trade:

| Blooms from ore and pig iron | 58,000 | 62,564 | 61,670 |

The consumption of rails in any given year can be ascertained with a great degree of accuracy by assuming that the quantity carried over from year to year is always about the same, and that the total of imports and production is therefore consumed. The following table will show the probable consumption of rails in this country during 1872, 1873 and 1874:

| RAILS. | 1872. Net Tons | 1873. Net Tons | 1874. Net Tons |
|---|---|---|---|
| Production of iron rails | 905,930 | 761,062 | 584,469 |
| Production of Bessemer rails | 94,070 | 129,015 | 144,944 |
| Importation of iron rails | 381,064 | 99,202 | 7,796 |
| Importation of Bessemer rails | 149,786 | 159,571 | 100,486 |
| Probable consumption | 1,530,850 | 1,148,850 | 837,695 |

These figures indicate a reduced consumption of rails of all kinds in 1874 of 311,155 tons, as compared with 1873, and of 693,155 tons as compared with 1872.

## COTTON STATISTICS.

Previously to 1790, the United States did not export a pound of cotton. A little had been raised for domestic use before the Revolution, but the quantity was of no importance. In 1791 the trifling quantity of 189,316 lbs. was exported, and in 1792, 138,328 lbs.—not enough in both years to load an average sized schooner. About this time Eli Whitney invented the cotton gin, by which the wool of the upland cotton is separated from the seed with facility, whereas before the process was so difficult that the cotton was hardly worth the labor of preparing it. The effect of this invention was immediately perceptible in the exports of cotton, which increased in 1794 to 1,601,760 lbs., and in 1795 to 5,276,300 lbs. By 1821 they had increased to 124,893,405 lbs. of the value of $20,157,484, and at present the exports upon an average exceed 1,100,000,000 lbs. of the average value in our paper currency of $200,000,000. The following table shows the annual production of cotton in bales in the United States for a period of 54 years.

The above statistics show an average for the last three years of nearly 4,000,000 bales. Of this aggregate, on an average of the last four years, 1,200,000 bales a year have been consumed by the manufacturers of our own country. According to the valuable statistics of *The Commercial and Financial Chronicle*, Northern manufacturers took from the crop 896,860 bales in 1869-70; 1,008,956 bales in 1870-1; 977,540 bales in 1871-2; 1,063,465 bales in 1872-3; 1,177,417 bales in 1873-4, and 1,062,522 bales in 1874-5. Manufacturers in the Southern States took 90,000 bales in 1869-70; 91,240 bales in 1870-1; 120,000 bales in 1871-2; 137,662 bales in 1872-3; 128,526 bales in 1873-4, and 130,483 bales in 1874-5.

The late J. R. McCulloch, an eminent authority in political economy among the inhabitants of the British Isles, expatiates in his Dictionary of Commerce on the immense obstacles to be overcome before the cotton manufacture could gain a secure footing in the United States. He regarded that species of industry as having been forced into a premature existence here by a protective tariff, and expressed the opinion that such a misdirection of capital and industry could

end in nothing but ruin to the parties involved in it. While the people of the United States can agree with Mr. McCulloch that without the protection of the tariff the cotton manufacture could never have reached its present development in our country, it may at the present time be seriously debated whether the manufacture might not continue to flourish with unahated vigor were the protective duties aholished and revenue duties alone collected, as is the case in Canada. The fact, however, is beyond douht that the United States rank next to Great Britain and far in advance of all other countries in the manufacture of cotton goods, though the products of our factories are almost exclusively for home consumption.

The United States produce more cotton than all the rest of the world together. The annual consumption of cotton in Europe and North America is now estimated at 2,700,000,000 lhs., of which 1,250,000,000 are worked up in Great Britain, 925,000,000 lhs. on the Continent of Europe, and 525,000,000 lhs. in the United States. Of this total of 2,700,000,000 lbs., over 1,700,000,000 lhs. are grown in the United States, and less than 1,000,000,000 in India, Egypt, Brazil, and other countries. By consulting Table No. 2, on the preceding page, it will be seen that Great Britain is the destination of from two-thirds to three-quarters of all our exports of cotton, the greater portion of the remainder golog to the Continent of Europe. Table No. 3 shows that previously to 1861 more than three-fourths of all the cotton imported into Great Britain came from the United States, whereas upon an average of the last four years hut little more than one-half of the British imports came from this country. It will be noticed that a large quantity of cotton, which is finally manufactured hy the nations of Continental Europe is first imported hy Great Britain, and then re-exported to its floal place of destination. The quantity for the last ten years has ranged from 220,000,000 to 389,000,000 lbs.

## AMERICAN AND BRITISH SHIPPING.

The following tables exhibit, in the strongest light, the decadence in the foreign commerce of American shipping since 1860, and the great increase, during the same period, of British tonnage. Fifteen years ago two-thirds of the tonnage which entered and cleared at our ports, carried our own flag, and in British ports our flag was seen almost as often as British colors. The state of things is now reversed, British-huilt steamers and other vessels doing, we suppose, two-thirds of the foreign carrying trade of the world. The accompanying statistics, which have never before been placed in juxtaposition, will be found an interesting study.

## UNITED STATES REVENUE AND EXPENDITURE.

*It is sufficiently evident that, whilst one-third of the national revenue is necessarily absorbed by the payment of interest, a persevering application of the resources afforded by seasons of peace and prosperity, to the discharge of the principal, in the manner directed by the Legislature, is the only effectual mode by which the United States can ultimately obtain the full command of their revenue, and the free disposal of all their resources.—Albert Gallatin, Report on the Finances, Dec. 9, 1805.*

## THE FOREIGN MARKETS FOR OUR BREADSTUFFS.

The first of the subjoined tables shows that while the exports of our wheat to foreign countries are subject to great fluctuations, the movement for the last two fiscal years has been on a greater scale than during any former period. The total exported, exclusive of flour, rose from 8 million bushels in 1859, to 87 millions in 1862; then fell to less than 6 millions in 1866, and increased again to 71 millions in 1874. The second table shows that the British imports of wheat from each country are subject to corresponding vicissitudes, the fluctuations in the aggregate imported being less violent, but still considerable. The average quantity imported into Great Britain for five years past, including 1875, which is not embraced in our table, is about 42½ million cwts., or 80 million bushels. The United States, counting the exports directly from our own ports and indirectly through the ports of Canada, are by far the most important source of supply. For the annual value of the wheat exported from the United States to all countries, and imported into Great Britain from all countries, see the tables on pages 10 and 11.

In addition to the exports of wheat, there were exported from the United States, in the fiscal year 1874, 4,094,094 barrels of wheat flour, and in 1875, 3,951,086 barrels. The principal countries to which flour is exported from the United States are Great Britain, the West Indies, Brazil, the British North American Provinces, New Grenada and Venezuela.

For four years past the exports of Indian corn have been of great consequence, the quantity averaging more than 80,000,000 bushels a year, and the value exceeding $25,000,000 in paper currency. Great Britain is the principal market for this product, the quantities sent to other countries being comparatively insignificant.

## Currency Contraction.

The laws in force affecting the paper currency of the country have produced a contraction of the circulating medium during the 17 months ended Nov. 30, beyond the expectation of the general public, as may be demonstrated by the light cast upon the subject by the recent report of Controller Knox on the National banks, viz.:

I. The legal-tender money, issued directly by the Government, was,

| | |
|---|---|
| On 1st of July, 1874 | $382,000,000 |
| On 1st of December, 1875 | 372,471,772 |
| Decrease | $9,528,228 |

The above decrease is to compensate for the issue since Jan. 14, 1875, of $11,010,360 additional circulation to the National banks.

II. The fractional currency outstanding was,

| | |
|---|---|
| On 1st of July, 1874 | $45,881,296 |
| On 1st of December, 1875 | 42,356,105 |
| Decrease | $3,525,191 |

III. The National bank circulation outstanding was,

| | |
|---|---|
| On June 20, 1874 | $349,894,182 |
| On November 1, 1875 | 345,586,902 |
| Decrease | $4,307,280 |

IV. Under the Act of June 20, 1874, for retiring bank circulation, the greenbacks remaining on deposit with the U. S. Treasurer, for the redemption and retirement of bank notes was,

| | |
|---|---|
| On November 1, 1875 | $20,238,642 |
| On June 30, 1874 | 3,813,675 |
| Increase | $16,424,967 |

V. The currency balance of the Treasury was,

| | |
|---|---|
| On June 30, 1874 | $14,576,011 |
| On November 30, 1875 | 12,014,962 |
| Decrease | $2,561,049 |

Finally, summarizing the above changes, we have the following as the net result:

| | |
|---|---|
| Decrease of legal tenders | $9,528,228 |
| Decrease of postal currency | 3,525,191 |
| Decrease of bank notes | 4,307,280 |
| Increase of legal tenders on deposit for redemption of bank notes | 16,424,967 |
| Total contraction | $33,785,666 |
| Treasury balance reduced | 2,561,049 |
| Net contraction | $31,221,617 |

As regards the banks, the contraction is $15,233,192 greater than the above total, that being the amount of permanent deposit with the U. S. Treasurer for the redemption and return of their notes.

Benjamin K. Phelps's maj. over Peter B. Olney, 26,593; William H. Wickham over Wales, 33,118; over Oswald Ottendorfer, 45,845; over both, 8,892.

An election was held in the thirty-third district (Cattarangus and Chantauqna Counties) for representative to fill the vacancy caused by the death of the late Augustns F. Allen; bnt it was attended by so mnch informality that the State canvassers declined to declare the election of either Charles S. Cary or Nelson I. Norton, who were the leading candidates; so unless the House of Representatives shall determine which, if either, of the gentlemen was chosen, the district must for the present continue to be unrepresented in Congress.

firmly to the great principle, that in sickness Nature should be *assisted* not *prostrated.* It is because TARRANT'S EFFERVESCENT SELTZER APERIENT refreshes and invigorates the system, while it removes, without pain, all obstructive matter from the bowels, that it has become a standard alterative, and is

superseding all the stereotyped purgatives which have heretofore racked, and scourged, and weakened the human frame. The tonic, cathartic, and anti-bilious ingredients so happily blended in the waters of the celebrated Seltzer Spring, as well as the ebullience peculiar to that natural corrective and febrifuge, impart

now being prescribed by physicians everywhere as a superior cathartic nervine tonic, and blood depurent. Violent drugs have had their day. The faculty and the sick alike discard them, and having proved the excellence of the APERIENT, are determined to "*hold fast to that which is*

## GOOD."

The preparation will keep for a length of time, and all that is necessary to convert the powder into a sparkling, foaming, thirst-quenching, and delicious draught, is the addition of a little cold water. Thus may every invalid have a duplicate of the Seltzer Spa at his elbow, although the natural fountain bubbles from the earth in Prussia, four thousand miles away.

# NEW YORK TRIBUNE.

*"THE LEADING AMERICAN NEWSPAPER."*

The year 1876 promises to be crowded with more important and interesting occurrences than any since the close of the war. We shall celebrate the one hundredth anniversary of our national birth with the most remarkable display of our arts and industries, and the greatest concourse of visitors ever seen on the continent. We shall elect a new President under circumstances which threaten to make the political campaign peculiarly exciting. The House of Representatives for the first time since the close of Mr. Buchanan's term is under the control of the Democratic party, and it proposes to lay bare the secrets of the Administration now drawing to a close. Its course during the next six months will define the policy by which the Democratic party hopes to rule the country; while the action of the Republicans is likely to determine whether the organization which saved the Union and freed the slave is to fall to pieces or enter upon a new career of usefulness. In the practical work of government there are great abuses to be swept away, and many promises to be put to the test. In the settlement of the national finances the year may mark the crisis of our affairs. In trade, commerce and productive industry there are hopes that it will witness the long deferred revival. In religion it promises a great revival, and there are many signs that the relations of the Church to the State, and particularly to the State schools, will provoke sharp discussion, and enter largely into politics.

In such a stirring and crowded period, THE TRIBUNE confidently appeals to its past record and its present performance, as constituting its claim for the continued regard of all old readers, and the accession of many new ones. No intelligent citizen can afford during such a year as 1876 to dispense with an independent newspaper, upon which he can rely for an impartial record of events, undistorted by partisan necessities or personal hates or ambitions.

THE TRIBUNE will maintain with the old fervor the old Republican principles of which it was the champion all through the American conflict, and it will rejoice whenever those principles are victorious under the old banners. But it can never be the servant of caucuses or conventions; it must approve what it finds good in the acts and professions of either party, and apologize for the wrongdoings of neither. In giving the news it endeavors to set forth the truth, the whole truth, and nothing but the truth; in politics its great object is to elect honest men, whom the country knows and can trust; to secure hard money, Administrative reform, such economy in public affairs as the hard times compel from private citizens, and, as a consequence, lower taxes. Thus it found itself last Fall, rallying the forces for the splendid hard-money triumphs won by the Republicans and their allies in Ohio and Pennsylvania, and as earnestly striving to hold up the hands of an Administration in New York, which was busy fighting the Canal Ring, stopping leaks in the treasury, and lowering taxes. In each case it found the people sustaining its positions, and it hopes to be so clearly right in its political course

through all the storms of 1876 as to win equal success, and command yet greater approval.

One result of this policy of struggling for the triumph of honest men and sound principles, without being too much controlled by mere party names, has been that both parties find themselves forced to abandon some of the worst practices of the old caucus system, to put forward their best men, and to practice some of the reforms they preach. It may fairly be claimed that conscientious and independent voters have thus within two or three years gradually forced both parties up to a somewhat higher plane, and we may hope that the Centennial year will witness still greater improvement.

THE TRIBUNE will continue to labor for this end with the methods which have already commended it to popular favor. It will endeavor to combine the utmost candor with judicial fairness; will keep its columns free from personal wrangling; will waste no time in replying to the incessant attacks its success provokes from envious rivals, and as heretofore will reserve all its space for its readers' interests.

From those who believe such a journal a desirable visitor in their families, THE TRIBUNE solicits a continuance of the favor it has so conspicuously enjoyed in the past. During the years 1874 and 1875 the position assigned it long ago by foreign critics, "as the leading American newspaper" has come to be generally recognized, and its circulation has been greater than at any previous period in its history. It has won this position by the closest watchfulness and the most lavish expenditure to procure the freshest intelligence, the most complete reports, the most interesting letters and essays, and the ablest work in every department. Its staff includes the most accomplished men in the profession, and among its outside contributors it numbers many of the most eminent men in the country.

# MOVABLE AND SOLID TEETH CIRCULAR SAWS.

*The above cut shows a section, in reduced size, of R. Hoe & Co.'s new Chisel-Tooth Saw. Patented May* 12, 1874.

The teeth or bits are made of the best edge-tool steel, and are furnished spread and ground ready for use, no swedging or filing being required; they are all exactly alike, cut smooth, and the corners will not break off even in the hardest knots. One tooth costing but three cents will cut, depending upon the quality of the timber, from fifteen hundred to three thousand feet before it is worn out, and a saw with thirty teeth will cut from forty to one hundred thousand feet to each set.

The shank holding the teeth is made of the very best spring steel, thoroughly tempered, and from the manner in which the teeth are inserted in shank and the shank in the saw, there is no possibility of either becoming displaced.

One set of teeth may be removed and replaced by another, in less than five minutes.

This style saw is the strongest ever made, and if run upon iron may be repaired at one-tenth the cost of any other; and to work it requires *twenty-five per cent.* less power than the average saw.

We guarantee each saw to give entire satisfaction, and are receiving the most flattering reports from those we are sending out daily.

## FOR THE NEW YEAR, 1876.

POSTAGE FREE.

### THE BEST PAPER THAT EXPERIENCE AND CAPITAL CAN MAKE.

We are profoundly grateful for the generous and increasing support of the American public which we are made to feel at the close of every year when the renewed and new subscriptions to the *Ledger* flow in, like the influx of a mighty tide. This liberal support we make unremitting efforts to deserve. We select the best writers in the world without regard to cost, for, once convinced that one author will be more acceptable to our readers than another, the price is never permitted to be an obstacle in our way.

We have now had many years' experience, and we shall leave no exertion unmade to render the *Ledger* for the year **1876** superior to any preceding volume.

Our most popular old writers, whose excellence is established, will write, as heretofore, most of them exclusively, for the *Ledger*.

We are always on the alert for any new feature that we think will render the *Ledger* more attractive.

The *Ledger* is always a *live* paper, keeping pace with the genius and spirit of American progress.

It contains the purest, sweetest, and most delightful stories, striking narratives, and instructive biographical and historical sketches.

It has the most popular and carefully prepared collection of scientific facts.

We shall continue to reply to questions on all interesting subjects as heretofore. Not only are these questions genuine, coming directly from the people, but we receive thousands more than we have space to answer.

We receive constant assurances, in almost countless letters, of the happiness which the *Ledger* carries into the families where it goes. All who wish to secure to themselves that enjoyment will send in their subscriptions without delay.

*Our subscribers will have no postage to pay.* We prepay the postage on every paper that we mail. Notwithstanding this, there will be no increase in the price of the *Ledger*. As will be seen by the following, our rates remain unchanged:

### OUR TERMS FOR 1876.—POSTAGE FREE.

Single copies, $3 per annum; four copies, $10, which is $2.50 a copy; eight copies, $20, *postage free*. The party who sends us $20 for a club of eight copies, (all sent at one time,) will be entitled to a copy *free*. Postmasters and others who get up clubs, in their respective towns, can afterward add single copies at $2.50. No subscriptions taken for a less period than one year. When a draft or money-order can conveniently be sent, it will be preferred, as it will prevent the possibility of the loss of money by mail. Remember that the postage on the *Ledger* to all parts of the country will be paid by us, so that our subscribers will have no postage to pay.

☞ We employ no traveling agents. Address all communications to
